submissions:

30 June 2022

Message from the Guest Editor

The 10th anniversary of *Electronics* is coming in 2021. Since its first paper published in 2011, *Electronics* has received important support and excellent contributions from women scientists.

To celebrate and highlight the achievements of women in the research area of electronics, this Special Issue, entitled “Women in Electronics”, will present electronics-related work from leading women scientists. We also hope that this Special Issue will further encourage and promote the scientific contributions of women researchers in this field.

A “Women in Electronics Award” will be launched and granted to the best paper published in this Special Issue. The winner will receive a certificate, an award of 500 CHF, and an opportunity to publish her next submission in *Electronics* free of charge.

To solicitate women's interest in STEM (Science, Technology, Engineering, and Mathematics) education, the Special Issue is also devoted to young women scholars in these scientific disciplines, and further discounts will be reserved to submissions coming from them.
